

# BIBLIOGRAPHY OF WORKS PUBLISHING OR CITING MATERIAL FROM THE ARCHIVES OF SCIENTIFIC PHILOSOPHY

Prepared by Brigitta Arden,  
Associate Curator

The 260 works listed in this bibliography, published between the years 1982-2006, all draw on the Archives of Scientific Philosophy in one way or another. Some items reproduce entire documents from the collections. Others quote significant passages, and still others merely paraphrase material. A given work may do all three. Furthermore, a publication may cite scores of documents or just a couple. In each case, however, the work has been directly examined to ascertain what material from the Archives it uses. This enumeration is based mostly on records of permission granted to researchers either to quote from or to publish material belonging to the Archives.

Other works of scholarship that draw on the Archives of Scientific Philosophy are in progress. Recently, the authors of 2 books, 17 articles, and 3 dissertations have applied for permission to publish or quote from material in the collections. These additional items are expected to appear within the next year or so, at which time they will be entered in the bibliography.
